

## Cranial Helmet Comparison

<p><b>Orthomerica's STARband</b>  <a href="https://www.orthomerica.com/product-category/starband/">https://www.orthomerica.com/product-category/starband/</a></p> 	<p><b>NEW! Invent Medical USA's Talee</b>  <a href="https://www.taleetop.com/usa/">https://www.taleetop.com/usa/</a></p> 
STARband has been used in the U.S. for over 20 years.	Talee has been used in Europe for 7 years and has been recently released by the FDA for use in the U.S.
STARband is made of ½ foam and 3/16 plastic.	Talee is made of 1/8 foam and is 3D printed with a plastic material that is nearly 3/16 thick – because of this, Talee is lighter and cooler with its ventilated print design.
STARband comes in several transfer patterns.  <a href="https://www.orthomerica.com/transfers/">https://www.orthomerica.com/transfers/</a>	Talee comes in a variety of colors, fonts, and symbols.  <a href="https://www.taleetop.com/usa/customize/">https://www.taleetop.com/usa/customize/</a>
	
<p>A scan is taken of your baby's head and used for fabrication.</p> <p>The STARband helmet will be fitted to your baby's head within 2 weeks of the initial scan.</p> <p>After fitting, your baby will come in for a two week follow up, and then every three weeks until treatment is concluded.</p> <p>A progress report is given at the end of treatment.</p>	<p>A scan is taken of the baby's head and used for fabrication.</p> <p>The Talee helmet will be fit to your baby's head within 2 weeks of the initial scan.</p> <p>After fitting, your baby will come in for a two week follow up, and then every four to six weeks until treatment is concluded.</p> <p>Easy to read progress reports are available at each follow-up appointment.</p>
